✓

(c) Do the above estimated costs include indirect costs? ☐ Yes ☒ No. If yes, describe the method used to determine the proportionate share of indirect costs to be included with (2) SB, (3) SDB, (4) WOSB, (5) HUB, and (6) VET/SDVET concerns.

(d) The following method was used in developing subcontract goals (i.e., statement explaining how the product and service areas to be subcontracted were established, how the SB, SDB, WOSB, HUB, and VET/SDVET small business concerns' capabilities were determined, and identification of source lists and organizations contacted to obtain SB, SDB, WOSB, HUB, and VET/SDVET sources.)

All plan holders that were SB, SDB, WOSB, HUB and VET/SDVET were called, besides ones we are familiar with. We also compared all quotes to Pro.net to see if they were a certified HUBZone Small Business.

We only received two quotes that were of the above classifications

1) Force Traffic Control- to do traffic control

2) Construction Area Signs-to do signs and traffic control

they are both certified as a DBE & SWBE. We are using a VET/SDVET for the signs and using our own forces for traffic control.

Our sign supplier a VET/SDVET the percentage of his quote is .57%

Our striping subcontractor is in Redding, CA which we found a HUBZone contractor listed, but when putting the computer they say Redding is not HUBZone, the percentage of their subcontract is 1%.

See attached a list of State of California Minority subcontractors that we update and used in bidding this project. We received no other responses.
